The market-linked GIC offers the growth potential of a portfolio composed of the common shares or the units of twenty Canadian sustainable companies (the "Reference Portfolio"), while ensuring peace of mind due to capital protection at maturity.

The Variable Interest is calculated based on the price performance of the Reference Portfolio (please refer to page 3 for more details on Variable Interest calculation).

\* For information on availability, please consult your advisor.

\*\* Subject to normal market conditions. An investor who sells the market-linked GIC prior to maturity may receive less than the principal invested on the Issue Date, including in case of the investor's death. The amount indicated on your statements before maturity could therefore be less than your principal invested on the Issue Date.

## Sector Diversification

The Reference Portfolio Return calculation (as described below) is based on a price return of the Reference Shares and will not take into account dividends and/or distributions paid by the issuers on account of each of the Reference Shares. As of March 5, 2024, the dividends and/or distributions paid on account of all the Reference Shares in the Reference Portfolio represented an annual indicative yield of approximately 4.30%, representing an aggregate yield of approximately 12.90% over the term of the market-linked GIC, assuming that the dividends and/or distributions remain constant and are not reinvested.

## Reference Portfolio Selection Process

The Bank has concluded an agreement with Morningstar Research Inc. to access Sustainalytics<sup>3</sup> ESG research and ratings. Sustainalytics analyses, evaluates and rates a vast set of global companies using 300 ESG indicators, 20 material ESG issues and over 1,300 datapoints. Sustainalytics' Eligible Selection List is based on the 2,500 companies with the largest market capitalization in the world, from which the Bank then determines the Reference Shares included in the Reference Portfolio using its own additional criteria. Both selection processes are summarized as follows, please refer to the Information Statement for further details.

### 1. Exclusion Criteria

- › Companies that have been exposed to serious ESG controversies or incidents
- › Companies involved in, but not limited to, the following sectors:
  - Controversial weapons
  - Tobacco
  - Gambling
  - Thermal coal, oil and gas
  - Adult entertainment
  - Recreational cannabis
- › Any territorial criteria that may be relevant

Please refer to the Information Statement for further details regarding the thresholds used to determine the exclusion of companies as well as an exhaustive list of excluded sectors.

### 2. "Best in Class" Selection

- › Selection of companies with ESG ratings in the top two quartiles within their respective sectors

### 3. Resulting Reference Portfolio

- › A diversified Reference Portfolio of sustainable companies, as listed in page 2

## Potential Return

On the Maturity Date, investors will be entitled to receive a Variable Interest (as defined below), depending on the performance of the Reference Portfolio.

The potential return on the Reference Portfolio will be limited to the Maximum Interest. No interest or any other amount will be paid during the term of the market-linked GIC. If the Reference Portfolio does not generate a positive price return over the term of the market-linked GIC, the market-linked GIC will not generate any Variable Interest and, in this case, no return will be paid.

## Variable Interest Calculation

The Variable Interest payment is calculated as follows:

$$\text{Variable Interest} = \text{Principal invested on the Issue Date} \times \text{Reference Portfolio Return}$$

The Reference Portfolio Return is the arithmetic average of the Reference Share Return of each of the Reference Shares comprising the Reference Portfolio, subject to the Maximum Interest. The Reference Share Return used to calculate the Reference Portfolio Return is based on the average of three Reference Share Prices of each Reference Share determined over the last three months of the term of the market-linked GIC. As a result, a brief period of high market volatility at the end of the term of the market-linked GIC is less likely to have a significant impact on the Variable Interest.

The market-linked GIC is not a conventional fixed income investment, as it does not provide investors with a defined income stream or a return that can be calculated by reference to a fixed or floating rate of interest that is determinable in advance.

## Scenario Analysis

The following hypothetical examples are included for illustration purposes. The amounts and all other variables used in the following examples are hypothetical, are rounded for illustration purposes and are not forecasts or projections of the Reference Portfolio Return or the performance of the market-linked GIC. There can be no assurance that the results shown will be achieved.

### Hypothetical example of a Maximum Interest

The following table is based on the assumption that closing prices for the Reference Shares will **increase** during the term of the market-linked GIC.

Reference Share	Reference Share Initial Value	Reference Share Price at Average Valuation Date 1 (A)	Reference Share Price at Average Valuation Date 2 (B)	Reference Share Price at Average Valuation Date 3 (C)	Reference Share Final Average Value (A + B + C) / 3	Reference Share Return

The Toronto-Dominion Bank	\$84.10	\$117.11	\$123.27	\$129.44	\$123.27	46.58%
Wheaton Precious Metals Corp.	\$59.82	\$96.22	\$101.28	\$106.35	\$101.28	69.31%
Arithmetic average of the Reference Share Returns						56.09%
Reference Portfolio Return at maturity (Max. 35.00%)						35.00%
Variable Interest payable at maturity (\$1,000 investment)						\$350.00

In this example, the arithmetic average of the Reference Share Returns is 56.09%. The Reference Portfolio Return at maturity is subject to the Maximum Interest of 35.00%. Therefore, the Variable Interest payable at maturity on a \$1,000 investment would be \$350.00, representing an annualized return of approximately 10.52%.

### Hypothetical example of a positive Variable Interest

The following table is based on the assumption that most of the closing prices for the Reference Shares will **increase** during the term of the market-linked GIC.

Reference Share	Reference Share Initial Value	Reference Share Price at Average Valuation Date 1 (A)	Reference Share Price at Average Valuation Date 2 (B)	Reference Share Price at Average Valuation Date 3 (C)	Reference Share Final Average Value (A + B + C) / 3	Reference Share Return

Arithmetic average of the Reference Share Returns						17.19%
Reference Portfolio Return at maturity (Max. 35.00%)						17.19%
Variable Interest payable at maturity (\$1,000 investment)						\$171.90

In accordance with the Variable Interest calculation, the Reference Portfolio Return is 17.19%. The Variable Interest payable at maturity on a \$1,000 investment would be \$171.90 in this example, representing an annualized return of approximately 5.43%.

### Hypothetical example of a nil Variable Interest

The following table is based on the assumption that most of the closing prices for the Reference Shares will **decrease** during the term of the market-linked GIC.

Reference Share	Reference Share Initial Value	Reference Share Price at Average Valuation Date 1 (A)	Reference Share Price at Average Valuation Date 2 (B)	Reference Share Price at Average Valuation Date 3 (C)	Reference Share Final Average Value (A + B + C) / 3	Reference Share Return
Algonquin Power & Utilities Corp.	\$9.73	\$7.02	\$7.39	\$7.76	\$7.39	-24.06%
BCE Inc.	\$55.15	\$63.32	\$66.66	\$69.99	\$66.66	20.87%
Bank of Montreal	\$120.38	\$106.17	\$111.76	\$117.34	\$111.76	-7.16%

Arithmetic average of the Reference Share Returns						-11.47%
Reference Portfolio Return at maturity (Max. 35.00%)						-11.47%
Variable Interest payable at maturity (\$1,000 investment)						\$0.00

Since the Reference Portfolio Return is negative in this example, no Variable Interest would be payable at maturity in addition to the repayment of the principal invested on the Issue Date.
